COMPANY OVERVIEW

A Feiner Production provides end-to-end content production management for episodic and long-form video content — from development and writing oversight through production, post-production, and final delivery. Founded by a 20+ year senior television executive with a track record managing premium scripted production at the studio level (Sony Pictures Television, Amazon Studios), the company brings network/streamer-grade production discipline to government and commercial content programs, sourcing and managing vetted production crews and vendors as needed rather than carrying fixed overhead.

CORE COMPETENCIES

- **Content development and production management**, concept through final delivery
- **Concurrent multi-production oversight** — managed up to 8 series simultaneously
- **Budget and schedule control** on productions ranging \$4M–\$18M per episode
- **Complex, VFX-intensive production oversight** (writing, production, post-production, delivery)
- **Vendor, crew, and studio sourcing/management** — scalable resourcing matched to project scope
- **Quality control** to broadcast/streaming delivery standards

DIFFERENTIATORS

- **Studio executive background** (SVP Scripted Programming, Sony Pictures Television; overall deal, Amazon Studios) — not a camera crew bidding up, but a producer who runs the program
- **Proven multi-production management** of complex, high-budget, VFX-heavy content across multiple concurrent shows
- **Flexible production model**: no fixed crew or facility overhead — partners sourced and managed per project, controlling cost while preserving quality
- **Remote and international production oversight** — managed productions shooting across multiple U.S. states and internationally (Canada, Australia, and Prague); experienced coordinating crews, vendors, and deliverables across time zones, jurisdictions, and labor environments
- **Direct experience translating creative/technical requirements** into production plans, budgets, and delivery schedules

PAST PERFORMANCE

- **For All Mankind** (*Apple TV+*), **Cobra Kai** (*Netflix*), **The Blacklist** (*NBC*), **S.W.A.T.** (*CBS*), **Justified** (*FX*), **Preacher** (*AMC*, *international production*), **The Wheel of Time** (*Amazon Studios*, *international production*) — studio executive oversight of writing, casting, production, and delivery
- **Spider-Noir** (*Amazon Studios*), **Hell on Wheels** (*AMC*) — creative producer with day-to-day oversight of writing, casting, on-set production, editing, VFX, and music
